PLEASE DON'T SKIM READ YOU WILL MESS SOMETHING UP!

Rains Bot Lobby Tool Guide:

If you are having trouble following this guide don't be afraid to create a ticket in the discord for help and we will be with you asap

https://dcd.gg/rainslobbies

Throughout the setup process make sure you are following this Guide, these are all the possible things that can make Rains Bot Lobby Tool not work for you.

Downloads	Make sure to have python, google chrome and winrar all downloaded.
Requirements	Make sure to open the file named "RunThisFirst" inside the folder. This should install all the necessary requirements for you.
Chrome Profiles	Make sure you have google chrome downloaded then create multiple profiles by clicking the icon to the right of the search bar and then "add new profile". Label them as b1, b2, b3 and so on. IF USING ONLY 1 BOT/ACCT CREATE 2 PROFILES!

Profile Shortcuts	Create a shortcut for each of these chrome profiles by clicking the same icon, customize profile, scroll to the bottom a toggle "create desktop shortcut", the profiles should now appear on your desktop Next, label them the same way you named the profiles. b1, b2, b3, etc. In the main folder you'll find a sub-folder named "Shortcuts", now drag and drop the profile shortcuts in there.
Input Settings	Make sure your input settings are set to "Controller".
Graphic Settings	For lower-end machines, reduce graphics settings to the minimum as you don't need high graphics while not actively playing.
Stay Under 4K Resolution	Please use anything below 4K Resolution as 4K makes everything smaller so may cause issues.

How to run Rains Bot Lobby Tool:

1. Download the latest version of python. Download google chrome. Download Winrar

2. Add Python to PATH when installing.

3. Extract The Rains Bot Lobby Tool folder

4. Open the new extracted folder; Make sure to open the file named "RunThisFirst

5. Open google chrome and create multiple profiles and label them as b1, b2, b3, et CASE SENSITIVE a. IF USING ONLY 1 ACCOUNT, YOU STILL NEED TO CREATE 2 PROFILES

6. Create a shortcut for each of the chrome profiles and label them the same way you named the profiles. b1, b2, b3, etc. CASE SENSITIVE

7. Drag/Copy the new profile shortcuts and drop them in the "Shortcuts" folder. CA SENSITIVE

8. Run the .py.
